	ALMOND TASTE	LIMONCELLO TASTE
<b>ALMOND SPEEDY AND LIMONCELLO SPEEDY</b>	<b>70%</b>	<b>30%</b>

For this taste pairing, add **70% Almond Speedy Mix (blend)** and **30% Limoncello Speedy Mix (blend)**.

2

Go to the **Table of Ingredients** page and select the % corresponding to the selected ingredient.

[VISIT THE TABLE OF INGREDIENTS PAGE](#)

**FOR EXAMPLE:**

To prepare a **70% Almond mix (blend)**, select the corresponding values in the row **70% SPEEDY MILK FLAVOURS**, so **1,925 g of milk** and **875 g of Speedy milk flavour**;

SPEEDY MILK FLAVOUR										70%
Ingredient	10%	20%	30%	40%	50%	60%	70%	80%	90%	1925

to prepare **30% Limoncello mix (blend)**, select the values corresponding to the row **30% SPEEDY FRUIT FLAVOURS**, therefore **825 g water** and **375 g Speedy fruit flavour**.

SPEEDY FRUIT FLAVOUR										30%
Ingredient	10%	20%	30%	40%	50%	60%	70%	80%	90%	825

Speedy	125	250	375	500	625	750	875	1000	1125	375

3

Combine the mixes of the flavours to be paired, mix and churn.

# Instructions

**4** If the mix includes 2 or more Speedy of the same category (e.g. Speedy Milk or Speedy Fruit), it's enough to follow the instructions given in the corresponding section.

**5** For example, for the SALTED CARAMEL and CINNAMON mix, the percentages to be used are found in the **Speedy Milk Flavours** section.

**6** To calculate the correct quantities, select the percentage corresponding to the Speedy to match and combine with the second Speedy so that the total percentage is **100%**.

**7** **It's possible to create mixes with more than two Speedy,** as long as the final result comes to **100%**.

**8** The products **Speedy Elvetia, Speedy Elvetia Extra Bitter and Speedy Yoghurt** are in separate groups as they have different quantities.

**9** The final amount of liquids can be modified to vary the softness of the gelato. Increase the amount of liquids to obtain a harder gelato and decrease them to get a softer one.
